# C FRAME H FRAME

Our C-Frame and H-Frame hydraulic presses are distinguished by our commitment to quality and superior design practices, featuring:

High-rigidity frames optimized using advanced FEA (Finite Element Analysis) techniques

High-capacity cylinders designed to endure tens of millions of cycles without leakage or wear

Compact yet fully functional design

Simple, reliable control systems

Top-tier hydraulic pumps and valves for Unmatched reliability and long service life

RB5's hydraulic presses are the culmination of nearly four decades of continuous innovation, driven by observing our machines operate in the most diverse and demanding environments. Designed for high productivity and unmatched reliability, these presses deliver performance you can trust.
